

KEITH BONARRIGO

{ Portland, Or. USA | +1.206.852.7019 | <http://keithbonline.com> | keith@keithbonline.com }

I offer years of development experience with web-based applications, e-commerce websites, and various CMS platforms. I possess strong design and technical skills as well as the ability to carry responsibility in a larger development team. I've worked independently as well as with a variety of interactive teams and I'm comfortable and productive in either environment. I am fluent in English, Spanish, and Portuguese (Brazilian).

I have traditionally worked with smaller web development teams in an Agile-based development environment. This has been done either under my own small consultancy or contracting with others for more than a decade. I'm a self-starter and I've had the opportunity to work with clients of various sizes in a variety of platforms, languages, and technologies.

I've administered a high-volume e-commerce website tending millions of dollars per year. I've managed a remote Panamanian development team handling staff contact, strategy creation, task delegation, testing, quality control, and deployment. I've created and maintained an industrial level reporting portal to run complex SQL queries and produce human-readable results to aid in ordering, inventory, and sales. Please don't hesitate to contact me to learn more about the skills and experience I have to offer.

PRIMARY SKILLS & TECHNOLOGIES

PHP	CSS3	HTML5
jQuery	Bootstrap	(My)SQL
PSD to HTML	OOP	Git/GitHub/Subversion
Angular5	EXTjs	Dojo
Wordpress	Drupal	Joomla
Web Application	Apache/nginx	Unix/Linux

WORK HISTORY

05.2012 - PRESENT

EVERGREEN FINANCIAL SERVICES – Yakima, WA

Web Application Developer

<http://efscollects.com>

Creation of an object-oriented PHP based conversion script for client upload files. This is for a high-volume collection agency that receives account export files from a wide variety of financial platforms in a HIPAA compliant production environment. This data is run through a series of client upload accounts to normalize whatever client upload data they send to the FACS software import format. I've also been involved administration/technical oversight of their AIX Unix server platform.

Responsibilities Included:

- Custom object-oriented PHP scripting
- Maintenance of legacy perl script for client uploaded financial data conversions to native FACS software format
- Maintenance of AIX Unix local client directories via command line
- Maintenance of AIX cron job schedule to run a series of internal and external file delivery tasks

02.2016 – 04.2017

DICK HANNAH CAR DEALERSHIPS – Vancouver, WA

Front-End Web Developer / Database Design

<http://www.dickhannahkia.com/>

<http://www.dickhannahkia.com/specials/kia-factory-offers/>

<http://www.dickhannahkia.com/aisemailoutput/>

Creation of Wordpress front/back end functionality for the import and display of the manufacturer's various vehicle incentive offers. This serves and is displayed on all the various Dick Hannah dealership websites. A series of PHP scripts cues a web service to return XML based incentive data derived from location/make/model(s). This data is retrieved, parsed, and stored in a locally hosted MySQL database. A custom template fetches the incentive data and displays it with an HTML/CSS/jQuery front-end for both the public website and ongoing email campaign. All incentive visibility is staff-driven via a several custom back-end Wordpress plugins that I developed.

Responsibilities Included:

- Analysis of incoming data structure for vehicle incentives via webservice
- Design/creation of MySQL Database for storage of incoming data
- PHP/SQL development to call webservice and retrieve/parse/store data in local MySQL database
- Creation of custom back-end Wordpress plugins for staff tools to select incentive data for inclusion in public website and ongoing email campaign
- jQuery development for browser-based interactive behavior
- HTML/CSS/jQuery development for creation of custom responsive front end Wordpress templates for public website and email campaign

10.2015 – 02.2016

LEAN GOAT TECHNOLOGIES – Seattle, WA

Front-End Web Developer

<http://www.leangoat.com>

Development of the front-end UI for a proof of concept for a Seattle-based startup. An HTML/CSS/jQuery UI interface polls a JSON/NoSql server to retrieve image tagging data from a corresponding iPhone application and displays user-driven image comments/ratings.

Responsibilities Included:

- Creation of HTML layouts from PSD designs
- CSS styling for interactive and responsive layout
- Creation of web-optimized imagery from PSD layouts
- Javascript/JSON development for interactivity

02.2015 – 10.2015

PLAYON/MEDIAMALL TECHNOLOGIES, INC – Seattle, WA

Drupal Developer

<http://www.playon.tv>

Web development for a high-traffic Drupal site. Responsibilities included deployment of web code based on company design, cross-browser troubleshooting, authoring of Drupal modules and themes, translation of web content to Spanish language.

Responsibilities Included:

- HTML/CSS creation from PSD files
- jQuery programming for interactivity
- Creation of Drupal templates
- Content entry
- Translation of content into Spanish

02.2015 – 10.2015

ZIPWHIP, INC. – Seattle, WA
Front-End Javascript Developer
<http://www.zipwhip.com>

Interface development in the EXTjs Javascript framework for ZipWhip's proprietary text messaging display system for Sprint. This product is still currently in use by Sprint customers.

Responsibilities Included:

- Development of front-end widgets and components using EXTjs framework
- Alteration of JavaScript classes to alter functionality and styling
- Reviewing and adapting code to a product spec for Sprint Mobile's deployment of the web portal component as part of their premium text application/solution
- Creation/optimization of web optimized backgrounds, icons

09.2004 – 12.2015

FUSIONBEADS.COM – Shoreline, WA
Front & Back End Developer/Admin
<http://www.fusionbeads.com>

UI design/development. Full technical administration, development, and oversight of a multi-million dollar international e-commerce website operation including oversight of data integrity, inventory control and customer contact.

Responsibilities Included:

- Front-end development using PHP/Perl/HTML/CSS/AJAX/SQL
- Design of front-end components and graphics
- UI/UX design coding to functionality/style spec
- MySQL administration and query development/optimization
- Maintenance of a back-end CMS and reports generation server for full content / inventory control by the staff
- Apache/Linux administration
- Linux user administration
- PCI compliance
- General server configuration issues
- Cron job coordination across a multi-server network for a variety of script-driven automated tasks
- Some subversion administration

12.2004 – 07.2005

REDFIN, INC. – Seattle, WA
Front End Developer
<http://www.redfin.com/>

Front end HTML/CSS development for the coordination/deployment of a CSS-driven, Microsoft map-based UI, displaying MLS data from back-end Java servlets using Apache Tomcat Server for Redfin's 4.0 release.

Responsibilities Included:

- HTML layout creation from wireframes for MVC framework
- PSD to HTML development
- CSS styling for Microsoft map integration
- Collaboration with data team for the integration of back-end Java servlets
- Javascript programming for UI behavior

VARIOUS OTHER WORDPRESS SITES

These are various Wordpress sites that I've had something to do with, either by creating them completely or by developing/maintaining some component displayed.
